

# Information Security Governance & Management

## SESSION OUTCOMES

This awareness session is intended to provide participants with a sound understanding of the positioning of Information Security within any organisation and best practices on how to manage such a function – scaled for size and scope.

By the end of the course it is expected that participants will be in a position to trim their IS teams to best suit their company needs.

## SESSION DURATION

90 mins

## TARGET AUDIENCE

Designed for managers, particularly ones responsible for IS within their organisation.

## ABOUT THIS SESSION

The subject of Information Security (IS) can be quite confusing, complex and generally costly. In this session we aim to ease your burden and clear the fog around this subject. We aim to providing you with a sound understanding on how to manage Information Security efficiently within your organisation.

We will take you through topics like governance, structure and effective segmentation of IS teams – whether internal or as an outsourced business function. We take a look at some practical examples of IS management with the demonstration of the Cyber Kill Chain.

- Presenting you with **learning opportunities** about emerging technologies;
- Discussing talent management throughout the **employee lifecycle**;
- Showcasing the **wide portfolio** of IS for any business.

This way we aim to help you build your business case for IS within your company.
